Collier Township Municipal Authority

Emergency Response

Description of System

The Collier Township Municipal Authority's Wastewater Collection System consists of approximately 66.5 miles of pipe lines and manholes, and three (3) pumping stations. The Authority's System provides sewage service to approximately 2,873 customers and purchases Sewage Treatment from the Allegheny County Sanitary Authority (ALCOSAN).

Assessment of Equipment and Personnel

The Collier Township Municipal Authority personnel staff consists of the two (2) Office Administrators, who can be reached Monday through Friday, 8:00 A.M. to 4:30 P.M. at Office 412-279-4941, Fax 412-278-2001. The Authority does not own construction equipment or maintenance vehicles. All maintenance and repair work and construction of new lines are by contract with maintenance and construction contractors.

Collection System Problems

(Separate) Sanitary Sewer Overflows (SSO's) from diversion chambers, manholes and sewage backups into basements are the types of emergency situations which generally occur. On occasions, pump station malfunctions also cause overflows at the stations wet well (manhole). Overflows are generally reported by local residents or passerby, who either contact the Authority's office directly or the Collier Township Police Department (412-276-5051), Ron Brame, Collier Township Public Works Director (Office 412-429-6811) or PennDOT Route 50 Maintenance (412-221-3622).

Pump Station Locations

- Nevillewood St. Andrews Lift Station No. 1 located at 2090 St. Andrews Drive (paved access road off end of cul-de-sac). Telephone: (412) 279-4279
- Nevillewood Hilltop Lift Station No. 2 located at 5012 Carnoustie Drive (paved access road). Telephone: (412) 279-3124
- Centennial Pointe Pump Station located at 156 Baldwin Road at the intersection with Scotts Run Road. Telephone: (412) 276-0804

Contact Personnel

The following list of personnel to be contacted when emergency situations are reported. If the person called is not available, please call the next person on the list and leave messages, repeat as necessary.

A. When (separate) Sanitary Sewer Overflows (SSO's) from manholes and diversion chambers or sewage backup into basements occur.
